The Molto Collectibles BRAND

Molto Collectibles was born in 2020 as a division of the Molto Italiano project with the intention of operating within the Interior Design sector through the selection and sale of vintage objects. The result is a gallery of objects and furnishing accessories, belonging to the highest Italian artisan tradition, carefully selected for our customers or for industry professionals.

The selection concerns very particular items, often unique vintage pieces, sometimes produced in limited editions; other times we have created, with the help of trusted craftsmen, a series of special pieces designed specifically for the home of each potential customer or to be included in Interior Design projects.

This guide offers an overview of all the services and possibilities that we can offer to design professionals. Thanks to our Molto Collectibles team we can design and develop Tailor Made items.

MOLTO COLLECTIBLES

The Design

Molto Collectibles editions are based on the production of high quality furniture and accessories for indoors and outdoors spaces. Our mission is to introduce a sophisticated "Italian style rediscovered" going beyond national limits as well.

This is possible by reconstructing the Italian design history: - 60s, 70s and 80s - in a new stylistic and furnishing context, where the combination of classical and contemporary language - of design objects and vintage pieces - finds a new formal, semantic and aesthetic meaning: **a new project view.**

*What are Molto Collectibles products?
These are bamboo products handcrafted
in a limited edition in our laboratories
also with recovery material.*

*Each item is crafted by artisans based
on custom made designs. Each small
detail is done with caution and offers the
possibility of choosing different finishes.*

“Edizioni”

Molto Collectibles creates limited edition products for furnishing living spaces.

The design of each object is developed internally by our team, modulating the stylistic choice on the themes of essentiality, detail and combinations between objects. From **consoles** to **desks**, from **bedside tables** to **chests of drawers**, through **seats**, **lamps**, **vase holders** and a vast range of **furnishing accessories**, each Molto Collectibles product aims to stand out for its rigorous quality and refined elegance.

The result is a unique product that plays with memories by inserting them in an original and contemporary language.

Thanks to the quality of the production and the strength of the image, Molto Collectibles products have entered the reference market efficiently.

Tailor Made projects

Given the growing demand for "Edizioni Molto" products and the customers' need for tailor-made products, the company has developed a process of personalized design divided into various phases: from design to logistics management.

All tailor-made projects are developed starting from an initial cognitive phase where the design idea is transferred. After this phase, our team develops the technical drawings to define details and finishes. After approval by the customer, we move on to the production phase which takes place exclusively in our artisanal lab.

PROJECT JOURNEY

01 *the customer sends the sketch*

02 *technical development of the project and choice of finishes;*

03 *visual draft development for approval;*

04 *realization in our artisanal lab.*

A hand-drawn perspective sketch of a wooden table. The table has a rectangular top and four legs. The dimensions and labels are as follows:

- Top Surface:** The length is labeled as 900 mm. The width is labeled as 450 mm.
- Legs:** The height of the legs is labeled as 750 mm. The width of the legs is labeled as 300 mm.
- Labels:** The word "table" is written vertically on the left side. The word "leg" is written vertically on the right side.
- Decorative Elements:** The table features a decorative cross-hatch pattern on the top surface and a decorative hatched pattern on the legs.

In this first phase the design idea is developed with the customer through the reception of sketches or with a brain storming done with our team.

CRISTALLO

Our team develops the technical project through the preparation of CAD drawings including structural details. At this stage, the finishes are chosen (for example: barrel color bamboo, handle details, etc)

03 Visual draft development

From the technical drawing we move on to the preparation of the visual draft through which it is possible to have an idea of the final project (finish, details etc). The draft is sent to the customer to be approved together with the technical drawings.

04 Production

Once the project has been approved, the production starts, according to the monthly planning, within our artisanal lab. The whole realization is given to master experts craftsmen.

Details and Finishes

Every aspect of the product can be customized, from the texture of the bamboo canes to the addition of geometric patterns made with the canes; from leather bindings to the addition of crystal shelves or metal and/or brass details.

In addition to the structural details, it is possible to customize the finish of the bamboo canes by choosing between different dimensions (diameter of the cane) and the choice of colour: natural, darker - like Edizioni Molto - or colored

Where required or where necessary, handcrafted processes such as **wicker** or **rush fabric tops** are integrated into the projects.

THE PARTNERSHIP WITH DEDAR®

Seats with Dedar® fabric cushions

It is possible to customize each project also through the choice of coverings for cushions and seats. In particular, our dedicated lab uses Dedar® fabrics for each type of covering.

Dedar® fabrics are characterized by seductive ranges of colors and original motifs, combining precious yarns with technological research on fibres, so as to offer multiple solutions for all types of upholstery. In this way, each project acquires a timeless elegance.

Logistic & Customer Service

The entire logistic phase is managed by our dedicated department which takes care of quoting each type of shipment by seeking the best price. All shipments are handled by dedicated couriers.

The goods are packed directly by our staff to ensure complete safety and avoid any type of wear.

From the confirmation of the order until its delivery, the department ensures complete assistance to the customer, updating him on the goods pick up and the courier's track.

The possibility of continuous direct contact with our team guarantees 360° assistance on each step of the supply chain.

The possibility of continuous direct contact with our team guarantees 360° assistance on each step of the supply chain.

All orders are confirmed with a 50% deposit. The shipment of the goods is made once the payment has been made.
